

Task 4: Robot Testing and Control

Prerequisites

- Verify the Thonny(Python IDE) program in the Raspberry pi.
- Basic Knowledge on pushbuttons, LEDs and motor control using Python required.

Preparation

- Using the link below, study how to control Pushbuttons, LEDs and Motors with the Raspberry Pi .

<https://www.raspberrypi.org/documentation/usage/gpio/python/README.md>

<https://projects.raspberrypi.org/en/projects/physical-computing/14>

Task Description:

- a) Using Python, query the pushbutton and use it to switch LED on and off to test the functionality of the ET1 Robot.
- b) Using the pushbutton, cause the robot to rotate on the spot for 20 seconds.
